Windows: <https://download.wireguard.com/windows-client/wireguard-installer.exe>

Mac: <https://itunes.apple.com/us/app/wireguard/id1451685025?ls=1&mt=12>

Others: <https://www.wireguard.com/install/>

VPN Configuration

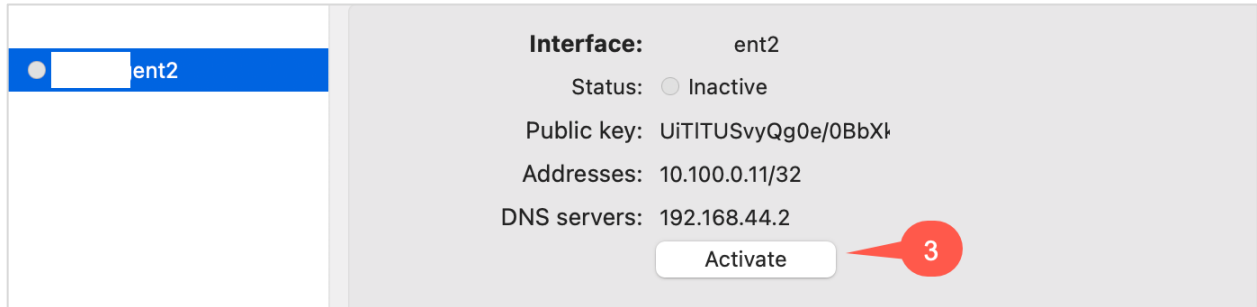

Once VPN software is installed, configuration file has to be import and click on Activate button to connect with VPN.

Download Configuration file which sent to your email and select it.

Once Conf file is uploaded, Click on Activate button to Connect with VPN.

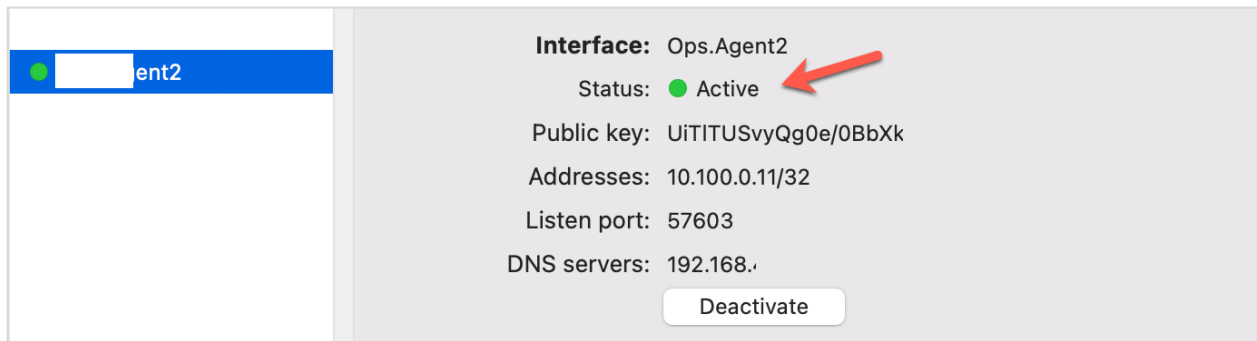

The screenshot shows a configuration panel for an interface named 'ent2'. The interface is currently inactive. The configuration details are as follows:

- Interface:** ent2
- Status:** Inactive
- Public key:** UiTITUSvyQg0e/0BbXk
- Addresses:** 10.100.0.11/32
- DNS servers:** 192.168.44.2

An 'Activate' button is located at the bottom of the configuration area, and it is highlighted with a red callout bubble containing the number '3'.

VPN is connected now.

The screenshot shows the configuration panel after the VPN is connected. The interface is now 'Ops.Agent2' and its status is 'Active'. The configuration details are as follows:

- Interface:** Ops.Agent2
- Status:** Active
- Public key:** UiTITUSvyQg0e/0BbXk
- Addresses:** 10.100.0.11/32
- Listen port:** 57603
- DNS servers:** 192.168.·

A 'Deactivate' button is located at the bottom of the configuration area. A red arrow points to the 'Active' status indicator.

Merchant Panel will be accessible now with a link: merchant.zicharge.com
